Morgan Creek Global Equity Long/Short Institutional Fund 2022 Distribution Information

Below is the most recently reported distribution information for the Morgan Creek Global Equity Long/Short Institutional Fund.

Important Note: Investors will not experience a loss from a distribution. The per-share amount of a distribution is deducted from a fund's net asset value (NAV). Fund prices will reflect a NAV reduction when a distribution is paid. As the fund is currently in liquidation, all distributions are reinvested and the number of shares in the account will increase. This leaves the total value of the account unaffected by the distribution.

Long-term capital gain distributions are for the twelve month period ended October 31, 2022, while items of ordinary income and short-term capital gains will be estimated through December 31, 2022.
